

Transport information for Lithium-Ion batteries

With this transport information for lithium-ion batteries, Sennheiser electronic GmbH & Co. KG as a distributor of lithium-ion batteries and/or lithium-ion cells provides a summary of all test results and specifications required for the transport or shipping of lithium-ion batteries in accordance with UN Manual of Tests and Criteria Part III Sub-section 38.3.5.

Furthermore, we confirm that all our used batteries and cells comply with the requirements from Section 2.9.4 of the U.N. Recommendations on the Transport of Dangerous Goods.

Why is transport information required for lithium-ion batteries?

Lithium-ion batteries/cells or products with built-in lithium-ion batteries are considered Dangerous Goods. They are subject to international Dangerous Goods Regulations such as the "European Agreement concerning the International Carriage of Dangerous Goods by Road" (ADR).

There is a globally valid list that includes all dangerous goods with their assigned four-digit UN number, which can be used to assign the hazard class.

Should you require the test results for lithium-ion batteries for transport or shipping, this document provides you with all the information you need.
