

2N[®] INDOOR TOUCH 2.0

ANSWERING UNIT FOR INTEGRATION WITH HOME AUTOMATION

The 2N[®] Indoor Touch 2.0 answering unit guarantees reliable video door communication. The Android OS, more powerful hardware and simple user interface make it easy to integrate the 2N[®] Indoor Touch 2.0 with third-party applications. For example, home automation systems can be comfortably operated on the 7" touch screen made of tempered glass.

- Durable 7" HD touch screen
- Integration with home automation systems
- Easy connection via WiFi
- A clear, easy to use home screen
- Attractive, award-winning design
