

LIGHT UP WONDERFUL VISION

Dahua Color Optic Blast (COB) LED Solutions

Experience the incredible beauty of your digital content on a large LED video wall

Available in multiple sizes

Dahua Color Optic Blast

| Dahua Color Optic Blast (COB) LED

This latest technology allows LED displays to be made with very small distances between individual luminous bulbs.

This is possible by using COB (Chip On Board) technology. With this technology, multiple LED chips are packed together on a single substrate. This enables a brighter and more efficient light source than traditional LEDs, as the multiple chips work together to emit light from a smaller area.

These micro LEDs are glued directly to the PCB. A special Color Optic Blast coating has been applied to the front, which protects the LEDs from moisture, dirt and impact and also ensures high dynamic optical range. Colours become even more sparkling. Black tones are even deeper, light tones even brighter and colours sparkle on the screen. Viewing angles also get extremely much better. All this is also accompanied by much lower power consumption*

*COMPARED TO TRADITIONAL SMD LED TECH AND, OF COURSE, ALSO COMPARED TO TRADITIONAL LCD VIDEO WALLS.

Meeting Rooms

Our COB video wall is designed to deliver crystal-clear images from any angle, making it ideal for any meeting room.

A way to elevate your presentation and engage your audience in a way you've never experienced before. The screen utilizes the latest LED technology, making it energy-efficient and durable, saving you money on your energy bill and reducing the need for frequent screen replacements.

Education

With its seamless screen and bright, vivid images, our COB video wall makes every lesson more dynamic and exciting.

It's perfect for sharing multimedia content, such as videos, animations, and interactive games, to enhance learning and engage students.

Corporate

Impress your visitors from the moment they step into your company.

Showcase your brand, culture, and values in a way that truly stands out. Make a lasting impression on your guests and leave them with a positive impression of your brand.

Unified Communications

Say goodbye to boring and outdated video conferencing setups and upgrade to our immersive and dynamic COB LED wall.

With its ultra-wide aspect ratio and stunning display capabilities it takes your communication to the next level. Providing crystal clear visuals and vibrant colors that will make you feel like you're

in the same room as your colleagues using your favorite communication platform. Upgrade your communication game and experience the difference our 21:9 COB LED wall!

Complete Solutions

Optional installation service

Local reachable aftersale support by Dahua support team/certified service partner

Standard warranty 3 years

Extended warranty 5 years

Everything included

The LED wall controller

It is an essential component of an LED video wall system, providing users with a powerful and intuitive tool for controlling and managing the display of high-quality digital content. The controller includes features such as automatic calibration, color correction, and pixel-level brightness adjustment to ensure a high-quality image display.

Installing a COB LED video wall

It is a work for specialists. Our certified installation partners are trained to carry out this work to perfection based on an installation voucher sold by your Dahua dealer.

Exclusively for our COB LED video wall, Vogel's Professional has created mounting brackets. This way, your video wall can be perfectly mounted in any environment. Ask your dealer about the possibilities!

One stop solution
