MeetingEye BYOD Mode

Used as an USB VC endpoint

Manual Guide

Together with VCH51, Yealink MeetingEye Easy Mode is a BYOD mode allowing MeetingEye 400/600 to be used as a USB VC endpoint. Connecting any platform or meeting just by one cable to the computer, MeetingEye Easy Mode delivers a native, smooth and premium video experience anytime and anywhere.

Part1. Upgrade M400/600 to BYOD/USB mode

Step1: Log in to the web admin page of MeetingEye 400

Check the firmware version and make sure it is the lasted version. If not, click and download firmware：

Download Latest Firmware – 03-03-2021

> **Standard Version:** https://drive.yealink.com:4443/link/38DD9F0E0E56E45893A4E3D7CC2AE1F1
>
> Passcode：manu
>
> **Cloud Version**：https://drive.yealink.com:4443/link/654F85D7DDC1E222095A0D4162853DB2
